

HINES

Empowering Circular Economy for a
GREENER PLANET

HINES SUSTAINABILITY

Our STORY

We are a team of expert sustainability consultants committed to driving meaningful change. Our mission is to promote an empowered circular economy that fosters a greener planet. Through customized solutions, we enable businesses to adopt sustainable practices that deliver lasting environmental and economic benefits. We collaborate with recycling partners in the UAE, India, and the USA.

EPR SERVICES

- SPCB compliances and registrations
- CPCB Compliances and registration

- EPR Registration
- EPR Quarterly Returns Filing
- EPR Annual Returns filing
- EPR Credit Compliances
- ESG Reporting

Awareness Campaign, Workshop, and Collection Drive

- Organize Awareness Campaigns in schools and colleges.
- Conduct Collection Drives for PIBOs.
- Host Workshops for PIBOs.

EPR (EXTENDED PRODUCER RESPONSIBILITY)

- Extended producer responsibility (EPR) is a waste and pollution management concept that encourages companies to design more sustainable and recyclable products and manufacturing processes. To be compliant, businesses must demonstrate their efforts toward achieving a circular economy model, including product reuse, buyback, and recycling programmes. And while many companies are self-motivated to be better environmental stewards, EPR takes a more practical approach and recognizes that the best environmental results can be achieved when manufacturers, rather than local governments, are held responsible for the cost of sustainability – from raw materials sourcing to end-of-life and recycling.

EPR Compliances

Compliance with Reduction Of Hazardous Substances norms

Collection of E-waste EEE category-wise as per Collection targets setout in EPR authorization to producer and manufacturer

Filing Quarterly & Annual Returns with CPCB

E-waste collection points with E-waste collection bins

Timely response to respective State and Central Pollution Control Board notices

E-waste Awareness is a mandatory legal compliance

PLASTIC WASTE MANAGEMENT

At Hines Sustainability, we address plastic pollution with comprehensive waste management solutions, including collection, sorting, cleaning, shredding, and producing high-quality recycled products.

Our Services:

- Efficient Collection: Streamlined processes for gathering plastic waste.
- Sorting & Cleaning: Preparing plastics for recycling.
- Shredding & Production: Transforming waste into valuable materials.
- Why Choose Us:
- Certified Partnerships: Collaborations with certified facilities ensure compliance and support a circular economy.
- EPR Support: Assisting brands in meeting Extended Producer Responsibility obligations.
- Environmental Impact: Protecting ecosystems while fostering economic growth.
- With a focus on innovative technologies and eco-friendly practices, Hines Sustainability provides services that contribute to a cleaner planet and sustainable development.

E-WASTE MANAGEMENT SERVICES

At Hines Sustainability, we provide a full spectrum of e-waste management services through our certified recycling partners across Indonesia, India, Dubai, and the USA. Our Key Services:

- Nationwide Collection: Efficient collection and responsible processing of electronic waste.
- Secure Data Destruction: Compliance with strict standards to protect sensitive information.
- Resource Recovery: Eco-friendly processing with up to 98% material recovery, aligned with Basel Convention and WEEE Directive.

Additional Features:

- EPR Compliance Support: Helping manufacturers meet Extended Producer Responsibility requirements.
- Refurbishment Programs: Extending product lifecycles to promote a circular economy.
- Hazardous Material Management: Safe handling of hazardous waste.
- Transparency: Real-time tracking and certification for clients.

With a focus on data security and sustainability, Hines Sustainability leads the way in responsible e-waste management.

SUSTAINABILITY AUDITING AND CONSULTING SERVICES

At Hines Sustainability, we provide customized sustainability auditing and consulting services for organizations, businesses, individuals, and government entities, focusing on minimizing environmental footprints and enhancing social responsibility.

Our Services Include:

- Sustainability Audits: Comprehensive evaluations of alignment with Environmental, Social, and Governance (ESG) standards, covering energy consumption, carbon emissions, labor practices, and regulatory compliance.
- Consulting Solutions: Development of tailored sustainability strategies, implementation of energy efficiency measures, promotion of circular economy practices, and optimization of supply chains for ethical sourcing.

Our Commitment:

By fostering innovation and ensuring compliance with evolving regulations, we empower clients to achieve their sustainability goals and build a greener future.

Contact us today to begin your sustainability journey!

TYRE WASTE MANAGEMENT SERVICES

At Hines Sustainability, we offer comprehensive tire waste management solutions through a robust network of certified recycling partners across India, addressing the significant environmental challenges of tire waste, which can take up to 1,000 years to decompose.

Our Services:

- Efficient Collection: Seamless pickup from various sources.
- Shredding and Separation: Advanced processes to recover up to 90% of a tire's components, including rubber, steel, and fiber.

Recovered Materials Can Be Repurposed Into:

- Rubber Mats: For flooring and playgrounds.
- Road Surfaces: Durable, rubberized asphalt.
- Insulation: Eco-friendly building materials.

Our Commitment:

- Circular Economy: Promoting sustainable practices and resource recovery.
- Regulatory Compliance: Adhering to local regulations.
- Sustainability Reporting: Providing detailed reports on recycling impacts.

By partnering with Hines Sustainability, you support responsible recycling and contribute to a greener future. Join us in fostering a sustainable world!

USED OIL WASTE MANAGEMENT SERVICES

At Hines Sustainability, we provide comprehensive used oil waste management solutions through certified recycling facilities across India, tackling the environmental challenges of used oil disposal.

Our Process:

- Efficient Collection: Seamless pickup from various sources.
- Filtration: Removing contaminants to enhance oil quality.
- Advanced Re-Refining: Utilizing cutting-edge technologies to convert used oil into high-quality products, including lubricants, fuel oil, and asphalt additives.

Our Commitment:

- Regulatory Compliance: Adhering to all environmental regulations.
- Resource Protection: Safeguarding natural resources and reducing greenhouse gas emissions.
- Economic Benefits: Supporting job creation and promoting sustainable practices.
- By partnering with Hines Sustainability, you contribute to a cleaner planet while achieving your sustainability goals. Join us in fostering eco-friendly operations and making a positive impact!

ESG REPORTING SERVICES

At Hines Sustainability, we provide Environmental, Social, and Governance (ESG) reporting services to help organizations effectively communicate their sustainability efforts and ensure regulatory compliance.

Our Process Includes:

- Data Collection: Gathering key ESG metrics.
- Framework Alignment: Aligning with GRI and SASB standards.
- Tailored Reporting: Creating customized, engaging reports.
- Third-Party Verification: Enhancing credibility with independent audits.
- Regulatory Updates: Keeping you informed on evolving regulations.

Benefits:

- Build Trust: Foster loyalty through transparency.
- Manage Risks: Identify potential challenges.
- Attract Investment: Improve reputation to appeal to investors.
- Track Progress: Monitor your sustainability performance.

Partner with Hines Sustainability to enhance your corporate reputation and advance your sustainability goals. Contact us today!

CARBON CREDITS, GREEN CREDITS, AND CARBON FOOTPRINT MANAGEMENT

At Hines Sustainability, We Provide:

- **Carbon Credits Management:** Identify projects to generate carbon credits in compliance with standards.
- **Green Credits Acquisition:** Source renewable energy credits from verified projects.
- **Carbon Footprint Assessments:** Evaluate your organization's greenhouse gas emissions.
- **Ongoing Emissions Monitoring:** Track carbon emissions continuously to measure progress.
- **Access to Trading Platforms:** Facilitate efficient participation in carbon credit markets.
- **Transparent Reporting:** Ensure clear tracking of green and carbon credits.
- **Stakeholder Engagement:** Foster collaboration on sustainability initiatives.
- **Expert Guidance:** Leverage our knowledge of carbon markets and tailored solutions.

Partner with Hines Sustainability to enhance your sustainability efforts and support a greener future.

LANDFILL WASTE DISPOSAL SERVICES

At Hines Sustainability, We Offer:

- Efficient Landfill Waste Disposal: Responsible management of municipal solid waste across the UAE, India ,USA, and Indonesia.
- Public Health Protection: Prevent soil and groundwater contamination to ensure community safety.
- Environmental Sustainability: Utilize engineered systems to mitigate leachate and greenhouse gas emissions.
- Resource Recovery: Implement technologies for energy production from methane and composting of organic materials.
- Regulatory Compliance: Adhere to local and international waste disposal regulations.
- Comprehensive Services: From waste collection and sorting to monitoring and resource recovery, tailored to community needs.

Choose Hines Sustainability for expert waste management solutions that promote a cleaner, healthier planet.

MEDICAL WASTE MANAGEMENT SERVICES

Hines Sustainability Medical Waste Management Services:

- Comprehensive Solutions: Addressing the challenges of medical waste disposal through certified recycling and treatment facilities across India.
- Public Health Protection: Prevents exposure to infectious materials, safeguarding communities and healthcare workers.
- Environmental Safety: Minimizes contamination of soil and water through responsible recycling and disposal methods.
- Regulatory Compliance: Ensures adherence to stringent local and national regulations to avoid legal liabilities.
- Resource Recovery: Recycles plastics and metals to promote a circular economy and reduce reliance on virgin resources.
- Advanced Treatment Technologies: Utilizes autoclaving, incineration, and chemical treatment for effective waste management.

Choose Hines Sustainability for reliable medical waste management that prioritizes safety, sustainability, and compliance.
